

JOMA SUPERMARKET STOCK MANAGER v2.4.1 BUG FIXES

NO	<u>DESCRIPTION OF PROBLEM</u> <i>(Mention the procedure that leads to the error or simply an issue that should be fixed)</i>	<u>WINDOW</u> <i>(the name of the window in question)</i>	<u>COMMENTS</u>
1	<p>In most cases, interest is in viewing sales made in a day. I request that we also include the "TODAY" provision to select a period of sales. Also, there are days, especially Sunday when cashiers work half day. So, it would be good, if I could select or view a report by a cashier, with the total sales, each. Hope it does not need an addition of a row or column in database. I fear physically interrupting with it. Lol</p> <ul style="list-style-type: none"> I wish to be able to categorize sales according to the sales personnel <p>I wish that could be added to the Reports section. It's still missing something, I think. Exporting to excel or pdf, VAT report</p>	SALES >> FILE >> VIEW SALES	<p>Fixed in version 2.5</p> <ol style="list-style-type: none"> "Today" checkbox was added in version 2.4.1 For classification by Teller, Select "SALES (SUMMARY)". The Teller dropdown box will then be enabled and selecting a teller will automatically filter the sales report. VAT report is in (SALES DETAILED) To export to PDF, click the PRINT icon () on top of the report document viewer and select a PDF printer.
2	Ability to reprint a receipt, other than just view it	Sales >> File >> View Sales	<p>Fixed in version 2.5</p> <p>On the View Sales Window, right click any sale and "Re-print receipt"</p>
3	Logs! There are notifications like, "ADMIN edited 1 item". Is it possible to click on that "1 item" and view the item edited?	Admin >> Logs	<p>Fixed in version 2.5</p>
4	Generate Barcode, and Print it. Is it possible to include the item name and maybe Joma Supermarket at the bottom	Inventory	<p>Fixed in version 2.5</p> <p>Once we are checking goods in stock, it may</p>

	of the bar, plus the code number not only the bars?		be hectic to carry, scan to identify the name in the system. So, if the real code in the system is printed with maybe the name, then we could be able to easily identify it
5	After the sale has completed, the cursor remains in the amount paid text box. We managed to return it to Item Name text box after entering the quantity. I would wish that we also return it to Item Name after the sale has been completed (after pressing Enter and printing the receipt). In other words, the blinking cursor should be in Item name textbox once ENTER has been pressed.	Sales	Fixed in version 2.5
