

StockAppJOMAv3.0 Bug Fixes

#	DESCRIPTION OF PROBLEM	WINDOW	COMMENTS
2	DISPLAY! It displays, RECEIPT PRINTED and then TRANSACTION COMPLETE. I think RECEIPT PRINTED should be replaced with the CHANGE DUE (balance for the customer) and TRANSACTION COMPLETE should instead be a loop to take us back to WELCOME TO JOMA SUPERMARKET.	LCD POS DISPLAY	Fixed in version 3.1
3	DISPLAY! When an item is removed from the sales window, it is not automatically reflected on to the POS DISPLAY. The change is instead evident when another item is scanned.	LCD POS DIAPLAY	Fixed in version 3.1
4	Pressing F2 for a new window display the error message about missing COM19. I don't know if we can solve that by not displaying errors or working on it instead	Sales	Fixed in version 3.1
5	ANOTHER LCD DISPLAY BUG! When I withhold a receipt and start a new sales window, my LCD DISPLAY keeps showing the figures from the older receipt! SERIOUS PROBLEM	LCD POS Display	Fixed in version 3.1 Should not be the case! I think this was because of the error in (4). When new sale window opens, The EPOS is INITIALIZED and the welcome message should come.
6	We are yet to disable other columns a cashier sees as they search for an item	Sales >> Search Item	Fixed in version 3.1
